Office Action Summary

Art Unit: 2732

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-13 and 16-19 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Long.

Long discloses a telephone circuit to control off-hook status during receipt of called ID signal comprising:

preprogramming method device with access parameters;  
detecting a phone call;

receiving caller identification information without  
answering the phone call;

decoding caller identification information;  
comparing caller identification information with access  
parameters to determine whether access is authorized;  
if access is unauthorized, hanging up; and  
if access is authorized, enabling a connection to the  
telephone personal communications system (see details of  
figure 3B).

Art Unit: 2732

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 14-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Long.

Long discloses all the subject matter of the claimed invention with the exception of a list of unauthorized caller names in a communications network. However, using the list of the unauthorized caller names in the Long does not provide any unexpected results. Thus, it would have been obvious to a person of ordinary skill in the art at the time of the invention to use the list of unauthorized users names in the communications network of Long for the purpose of security reason.

In the remarks of Jan. 4, 2001, applicant traverses the rejection of claims 7-19 under 35 U.S.C. 102(b) and 103(a). The traversal is based on the ground that the references do not teach hang up. This argument is not considered to be persuasive, applicant's attention is directed at column 4, lines 58-60 and column 6, lines 11-16 wherein it teaches hang up.

Art Unit: 2732

4. All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, THIS ACTION IS MADE FINAL even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
